

## Biography:

### Gilbert Le Lann, Directeur du CEDRE / Director of CEDRE

Gilbert Le Lann graduated from Ecole Polytechnique in 1981 and from Ecole Nationale Supérieure des Techniques Avancées in 1983, with an engineer degree in electronics for maritime applications.

He occupied various positions within public national and international agencies over 25 years and left the French Secretariat general of the sea to join the Centre of Documentation, Research and Experimentation on accidental water pollutions, Cedre, as director in 2008.

Since then, he has been involved in the management of several accidents in France, such as the spill from the refinery of Donges in 2008 or the TK Bremen grounding in 2011, and participated in observation missions abroad in particular on the Deepwater Horizon rig accident in 2010.

He also chaired sessions and gave several lectures related to accidental water pollution issues in various national and international conferences.
